ABSTRACT

In the background of the new era, facing the complexity of the social environment and the diversity of values, the honesty education of college students is particularly important. Honesty education is not only the requirement of the Party and the state for higher education, but also an important link in cultivating high-quality talents and building socialist core values. As the successors of the cause of the Party and the country, the education of college students is closely related to the future of the country, which is not only related to whether the road of socialism with Chinese characteristics can develop in the right direction, but also related to the realization of the Chinese dream of the great rejuvenation of the Chinese nation. With the rapid development of social economy and the acceleration of globalization, the problem of honesty education for college students is the premise of whether college students can establish a correct outlook on life and values, but also the core content of their growth, and more related to all aspects of the future of the country. Therefore, whether from the perspective of the development of the Party or the personal growth of college students, it is of great significance to carry out honesty education for college students. Starting from the background and importance of honesty education for college students in the new era, this paper analyzes the current situation of honesty education in the new

era to explore the methods of honesty education, so as to provide theoretical reference and practical guidance for cultivating college students in the new era with noble moral quality and social responsibility.

Key words: new era; college students; clean education

Honesty education is not only an important part of the ideological and political education for college students, but also an indispensable part of the anti-corruption construction. To carry out honesty education for college students in the new historical period is the embodiment of the country's strengthening of clean government, the embodiment of modern ideological and political education, the inevitable requirement for the healthy development of college students' body and mind, and an important guarantee for the stable development of various undertakings in China.

1 The background and importance of clean education for college students in the new era

1.1 Background of honesty education for college students

In recent years, the party central committee with comrade xi for the core adhere to implement the "while the iron is hot still need their own hard" action concept, actively anti-corruption, dozen tiger beat fly, hair unreal punch, show "scraping the bone healing poison, strong man DuanWan" determination and "on not capped, not guaranteed" attitude, scale and

strength is the most since the founding of new China. However, while the anti-corruption work has achieved results, there are still some overlooked corruption problems at the grass-roots level.^①

China's discipline inspection and inspection team has found that many universities such as the National People's Congress, Wuhan University and Sichuan University have violated the spirit of the eight-point regulation of the CPC Central Committee, set up "private coffers", collected illegal "education" compensation fees ", and accepted bribes all show the seriousness of corruption in colleges and universities. The main reasons for corruption in colleges and universities are the lack of attention to the "four consciousness", the lack of clean education in colleges and universities, and the lack of responsibility for the "two responsibilities". As a result, the wind in the campus is not upright, the power can not be effectively constrained, the academic hall is infected with the utilitarian color, and corruption is inevitable.

College students in the new era hate the corruption problem deeply, and yearn for clean and honest role models and their deeds, but they have a weak awareness of anti-corruption, and it is difficult to pay attention to their own corruption problem. As an important part of the country, college students determine the importance of whether their values are correct for China's development, and the importance of their views and

^① Yin Huakai. To promote the great social revolution with the great self-revolution of the Party [J]. Research on Party Building, 2018 (11): 38-39.

behaviors on corruption.

1.2 The importance of clean education for college students in the new era

Entered the new era, college students' attention to the anti-corruption work is significantly improved, to the country's anti-corruption policy, anti-corruption, anti-corruption effectiveness of perception and recognition are improved, college students to the national anti-corruption work of corruption and corruption problems shows that the students honesty education is a necessary part.

Honesty education is the inevitable requirement of following the socialist core value system

The socialist core value system is the core of the value system of Chinese society, plays a leading role, and determines the development direction of China's value system. Among the socialist core values, democracy, equality, justice, patriotism, dedication and integrity are also the basic contents of honesty education. The university stage is the key period for the formation of individual values, and universities assume the necessary responsibilities of teaching, leading and cultivating the socialist core value system. In this process, honesty education, as an important element of the advanced socialist culture, is not only an effective way to spread honesty culture, but also deeply reflects the essential needs of the socialist core value system. The honesty education of college students aims to

deepen the understanding and identification of their spiritual connotation, which is an indispensable part of promoting the culture of honesty and strengthening the education of core values. As the successors of the socialist cause, college students are the first pass of honesty education, so that they can set up healthy and positive ideals, beliefs and moral concepts, which can lay a solid foundation for the construction of China's anti-corruption and anti-degeneration system. New era in our country is in the big change in one hundred, the temptation and impact from all parties, honest education for college students to make its clean consciousness, can consciously resist the temptation in the future work, become a honest man, at work in any position can have don't want to rot, not determination, this is not only the main goal of socialist clean culture, and is the socialist core value system.

Honesty education is the basic requirement to realize the task of cultivating moral education

②③General Secretary Xi Jinping has put forward: " Cultivating people by virtue is always the core of college education. In this process, it is necessary to integrate ideological and political ideas and teach people and educate people in an all-round way."Honesty education belongs to the category of morality, and is the value orientation and ideological realm

② Xi Jinping. Speech at the National Conference on Ideological and Political Work in Colleges and Universities [N]. People's Daily, December 9, 2016, page 1.

③ Zhang Alan. Research on the Path of strengthening college students' clean government education in the New Era [J]. Reform and Opening up, 2019 (01): 104-107.

widely respected by the society. It is the creative development after the combination of Chinese traditional culture, the creative transformation of the comprehensive development concept of Marxist people, the basic connotation of ideological and political education, and the primary task of honesty education for college students. Honesty education is to meet the development needs of people and cultivate the education activities of virtuous people, honesty education to tree people, the tree is virtuous people, but also "honest" people. The education of honesty for college students is not only the basic requirement of the task of cultivating moral education, but also the document spirit of further strengthening and improving the opinions on ideological and political education of college students. Therefore, we should incorporate the honesty education of college students into the talent training plan of colleges and universities, into the daily education process, learn from and innovate the teaching experience of related disciplines, and establish the goals, content and countermeasures of honesty education.

Honesty education is a necessary condition for realizing the power of talents

④In the reports of international organizations, there is the idea that preventing corruption is finally the institutional restraint itself. This shows that anti-corruption cannot cure the symptoms without corruption,

④ Song Dun fu. Honesty Education reader for College Students [M]. Beijing: Beijing Institute of Technology Press, 2010:3.

so the importance of education is highlighted, which is not only a response to the changing trend of global anti-corruption strategy, but also a realistic requirement of cultivating clean talents in order to realize the Chinese dream of great rejuvenation. Historical experience tells us that without social constraints and the establishment of individual integrity consciousness as the foundation, the country's clean government system can not operate smoothly. The rapid development of higher education in our country for the cause of socialism in our country has trained more and more highly educated talents, it also means that the future in enterprises and institutions, party and government organs and college students in all walks of life will improve, with the target of college students honest education, the stable development of the cause of socialism with Chinese characteristics, to achieve the great rejuvenation of the Chinese nation the Chinese dream is of great significance. To carry out honesty education for college students in the new era, so that college students can not only grow up in the construction of socialism with Chinese characteristics, but also devote themselves to the construction of socialism with Chinese characteristics, promote the integrity and order of the whole society, and make their own contributions to the realization of the Chinese dream.^⑤

2 The status quo of honesty education for college students in the new era

^⑤ Wang Xue. Research on the value connotation and cultivation path of college students' fighting spirit in the New Era [J]. Theoretical observation, 2020 (02): 148-150.

2.1 The construction of teachers is not in place

The team construction of honesty education in the new era is an important part of the honesty education for college students, and high-quality teachers is an important factor to improve the quality of honesty education for college students. Although the construction of honesty education for college students has been improved in the new historical period, there are still some problems.

There is a shortage of teachers. The most efficient way to carry out honesty education is to set up special courses and cooperate with professional teachers to teach. However, in the current campus, few schools can set honesty education as a professional course, so it is impossible to have a professional teaching team. For now, most of the colleges and universities to clean education way is into the education courses and specialized courses of education, through professional education teachers teaching, clean education as a teacher's content, is often combined with a chapter, is not systematic, so college students clean education teachers is some weak, it is difficult to achieve the expected education effect.

The teaching staff is not professional enough. The teaching staff includes the teachers and the student engineering departments. The student work department includes counselors, mental health counselors, and

administrators, who have the most contact with students except for professional ideological and political teachers. If the teachers of specialized courses conduct theoretical education for the students, then the teachers of the student engineering department should pay attention to the students' practice, so as to find out and solve the problems in time. Because of the lack of professional education, some teachers in the academic engineering departments do not understand and do the integrity, and the education of students is even more difficult. Due to the inability of professional teachers to carry out independent honesty education courses, they fail to become the main force in the honesty education team. With the above factors, the problem of honesty education has attracted the attention of the country and universities.

2.2 The form of educational content is not perfect

The content of honesty education is relatively scattered. Honesty education of college students itself should have a very rich content, Including the requirements of honesty and trustworthiness in moral education, National legal education in the construction of anti-corruption and ideal and faith education and so on, But in the current situation, In fact, the content of honesty education is often only scattered in the textbooks of ideological and theory courses, Through the situation and policy course to teach the current anti-corruption forms, review the course of anti-corruption, Through the basic principles of Marxism and

the relevant thoughts related to honesty education in Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, Although some results can be achieved, But there are also more fragmented content, Problems without coherence, It is difficult to attract the sustained attention of college students, It is also difficult to have a deep understanding of some of the content.^⑥ Although some honesty education materials have been published on the market, different textbooks have different emphasis, and in general, they tend to conduct simple theoretical elaboration and case explanation. It is difficult for students to think in depth when reading, which leads to insufficient deep understanding and easy to cause improper handling when encountering practical problems.

There are no specific teaching planning and evaluation criteria. At present, China has not yet built a systematic curriculum system in clean education, and the explanation of relevant courses is often fought for their own sake, lack of overall planning and design, so it is difficult to form a set of unified and stable teaching mechanism. Honesty education for college students is a process of multi-party participation and joint action. Only when the related elements are reasonably distributed and orderly operation can the role of honesty education be truly played. If the state and schools do not formulate relevant systems and plans, the role of the

^⑥ Zhang Xie zhen. Xi Jinping's important discussion on the training of good cadres in the New Era [D]. Nanchang Hangkong University, 2020.

same frequency resonance can not be fully played, and the effect of education will be greatly reduced. In addition, the corresponding evaluation criteria must be matched as the last link of the whole educational process. This link is not only a review and reflection of the existing teaching program and content, but also to identify the loopholes and deficiencies in the process of education, so as to guide us to carry out targeted improvement, and finally achieve the expected educational effect.

2.3 College students' practice and practice are not unified

Bad social phenomena have a negative impact on college students. With the rapid development of today's society, people's material life has been improved, while the cultural construction has not kept up with the pace of The Times, the erosion of money and the temptation of power still exist, which is not conducive to the formation of college students' world outlook, outlook on life and values.^⑦ The progress of the Internet has led to the invasion of some external forces with ulterior motives. College students are affected, their thoughts are blinded, and they even worship the "smart people" who gain benefits through "special" means and channels, and honest people are regarded as rigid and even ridiculed. Under the influence of these unhealthy tendencies, some college students will lose confidence in a clean society and have negative and corrupt

^⑦ Zhang Meng. Research on the current fetishism among college students [D]. Fujian Agriculture and Forestry University, 2020.

thoughts. When they enter the society, it is easy to have a bad impact on the society.

College students have a vague understanding of the causes of corruption. In the new era, college students generally do not recognize corruption, but they do not understand the causes of corruption. Most students tend to attribute corruption to several main factors: first, weak willpower, vulnerable to various temptations; second, the lack of necessary integrity education; third, the lack of punishment, making the cost of corruption relatively low. However, they rarely look at the impact of corruption from a deeper perspective, such as the wavering of ideals and beliefs, the distortion of values, and the erosion of feudal ideas on the corruption. This shows that college students have a one-sided understanding of corruption, and their in-depth understanding and thinking are still relatively weak. Therefore, in the process of carrying out honesty education for college students, we should help them to recognize the root cause of corruption, so as to understand the significance of the major strategic deployment of comprehensively governing the Party with strict discipline, and improve the college students' understanding and understanding ability of corruption.

3 The methods to carry out honesty education for college students

To carry out the new era of college students honest education, must be

reasonable use of ideological and political education method, the theory, model method, self education method into the daily life and teaching, from the education, engineering team construction, campus life, ideological and political education, cultivate the new era of college students.

3.1 The use of theory indoctrination in classroom teaching

Give full play to the role of classroom education as the main channel

⑧ Marxist theory courses and ideological and political education courses offered by colleges and universities are the main ways to conduct ideological and political education for college students, which should assume the important responsibility of honesty education for college students. Colleges and universities must start from classroom teaching, enrich the content of "two courses" education, open up new ways of education, combine the positive and negative examples through case teaching, and strengthen the credibility and authenticity of education. In addition, in order to deepen the level of honesty education, colleges and universities need to actively innovate and open up new areas of honesty education. In the teaching of Party classes and qingma Project, a series of special courses on honesty education are added, aiming to carry out special honesty education for party members, active members and

⑧ Wang Minrui, Chen Yongfeng. Thoughts on the influence of the implementation of the new supervision law on the construction of ideological and political theory courses in colleges and universities [J]. Youth, 2019 (20): 197-198.

outstanding student backbone students. Through their guidance and demonstration, it will become the core force to promote all students to learn and promote the culture of clean education, and finally achieve the goal of comprehensive coverage of clean education. If honesty education wants to avoid empty preaching and less effort, it must make clear its direction, understand the reasons for its role, on this basis from the two aspects of the reason, to achieve more satisfactory results.

Perfect honesty education in the ideological and political theory course

In the process of honesty education in ideological and political classroom, we should ensure that the content of honesty education goes deep into the teaching materials, integrates into the classroom, and touches the hearts of students. This requires us to continuously to the ideal faith education, socialist core values education and socialist outlook for honor and dishonor education, make clean education and ideological and political courses, thus prompting college students in cognitive, emotion, will, behavior and so on multiple dimensions, the clean education has a deeper understanding and identity, and enhance their integrity consciousness.

Honesty education as a kind of comprehensive education, not only to college students honest knowledge, but also guide them to set up correct honest values, let it in study, life and future work moment have clean sensitivity, in the face of corruption, deception and other corrupt social

phenomenon can be determined to fight. Schools must make full use of resources, to build a unified leadership, should in the clean education new pattern of education, clean education, arouse the enthusiasm of education teachers, full-time teachers and engineering department, combined with the new situation of the new era of anti-corruption construction, formulate the implementation of college students clean education plan, improve the content of honest education, innovation method of clean education, so as to realize the goal of classroom clean education.^⑨

3.2 Use example education in cadre training

Improve the integrity awareness of student cadres

Student cadres as an advanced figure in the students, held a certain position in the school, shoulder a certain responsibility, also played a exemplary role in the students, so the student cadres in the school should uphold the spirit of honesty and self-discipline, with the courage, courage to innovate spirit and positive vitality. Student cadres should become models of honesty with certain professional knowledge, guide other students correctly, let others understand what should be done and what should not be done, and form correct values. In addition, the student cadre must have firm non-corrupt ideal faith, glow non-corrupt mental state and strong sense of responsibility, so as to promote their rapid growth, better complete the teacher classmates assigned each work,

^⑨ Xu Guifang. On honesty education innovation of college students: idea, method and way [J]. Teaching (Higher Education Forum), 2017 (18): 49-51.

establish good student cadres in the teachers and students image, guide students firm responsibility and service consciousness, in the study and life are honest self-discipline, fulfill their duties.

Give play to the exemplary role of teachers

Clean education implementation of colleges and universities, not only need the counselors and education teachers, also need other student department joint construction, so can the cultivation of clean government assigned to different departments, to ensure that clean education to specific people, and related target completion as a reference for the year-end appraisal project, to improve the attention and initiative, and then play its exemplary role. In addition, we should improve the supervision system of clean education to ensure that clean education does not deteriorate. School party committee can form professional leading group for patrol, to ensure the effectiveness of clean education, avoid floating in the form, ensure the student cadre honest consciousness and behavior standards, guarantee universities form a unified honest education front, will implement anti-corruption work, with their own clean behavior motivate students, with age youth integrity to maintain the harmony of the society.

3.3 Improve students' awareness of self-education

School education is the main way for college students to recognize and

form honesty concept, and self-education is the destination of the final implementation of honesty education. Classroom education can only clean content into the students' knowledge system, and can do clean can only rely on the student's self-cognition, only effectively play the clean education subject self education function, guide the students' autonomous learning, self-reflection, conscious participation, constantly improve their honest self-discipline consciousness and outward into their own behavior. At present, there are still the phenomenon of fraud and lack of integrity in the student group. It is urgent to play the main role of college students in honesty education. Schools and families should create a good atmosphere, encourage college students to learn the consciousness of integrity spontaneously, consciously organize and carry out campus integrity cultural activities and practice the principle of integrity.

⑩To carry out social practice activities of honesty education among students, so that honesty education is more close to life, close to reality, so that students can experience the connotation of honesty from practical actions, so as to improve their own awareness and awareness of honesty. So to encourage students out of school, the society, to participate in all kinds of practical activities, such as aged respected community service activities, work-study activities, etc., make the students fully understand the society, into the society, enhance their social sense of responsibility

⑩Li Yulan. Strengthen the education of college students and promote the construction of socialist clean government [J]. Times Education, 2015 (19): 165-166.

and dedication consciousness, make them really feel honesty and corruption, cultivate the ability to distinguish between right from wrong, through self education form integrity, service people's fine style of work.
